

For over 320 years TAKEATA has been making bamboo products in Kyoto, where high quality bamboos are produced. Now they are actively involved in creation beyond tradition such as in manufacturing modern interiors and installation projects for artists. Their skilled craftsmen can flexibly meet diverse needs of clients in terms of the product requirements and the production scales. From one-of-a-kind item to mass production, from small items to construction materials, from traditional crafts to modern design; TAKEMATA continues to pursue the new creativity with the bamboo material.

Maker: **Takemata**
